

Freeman Productions Calendar Specifications – March 2009

We can use all of the below for output to plate.

Our preferred options in descending order are:

1. PDFs press ready with 3mm bleed all around (mac, pc)
2. Quark 7.1/6.5 – registered font supplied or outlined (mac, pc)
3. Photoshop CS2/CS – registered font supplied or outlined (mac, pc)
4. Indesign CS2/CS – registered font supplied or outlined (mac, pc)

Supplied images not included in a PDF:

1. to be scanned at 300dpi, 100% same size
(ie. if placed at 200% scans need to be 600dpi)
2. **RGB** (for conversion to our printer CMYK profile), or
3. Greyscale.

If you are using a pre-printed shell, the dimensions below are to be followed.
When creating your own personal base you can use the full 325mm wide and 220mm deep to suit your design.
